

USER MANUAL / WARRANTY CARD

MAX PRO X4

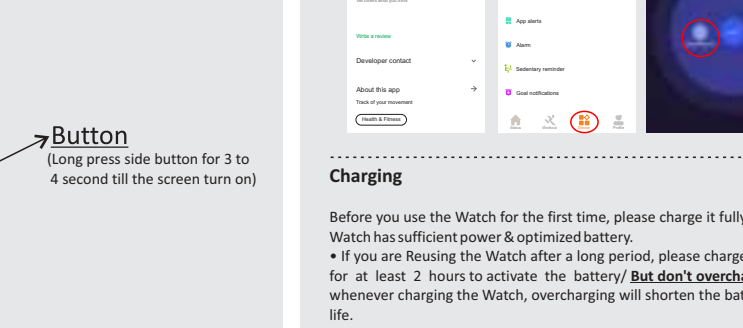

App Downloading

Scan the QR code to install the Pairing APP.

- Compatible with iOS 9.0 / Android 5.0 & above
- If software is not the latest Version, the APP may not work properly.

Post registration of your X4, warranty will be activated and regular firmware updates will be provided to upgrade software version

Switching ON the MAX PRO X4 watch

Button
(Long press side button for 3 to 4 second till the screen turn on)

Watch & APP Connecting

- Turn on your phone's Bluetooth and GPS. Make sure the watch is not connected to any other devices.
- Download [Coolwear/YFit App]—[App Device] Tap on MAX PRO X4 to pair it.

Post registration of your X4, warranty will be activated and regular firmware updates will be provided to upgrade software version

Charging

Before you use the Watch for the first time, please charge it fully to ensure the Watch has sufficient power & optimized battery.

- If you are Reusing the Watch after a long period, please charge the Watch for at least 2 hours to activate the battery/ **But don't overcharge it** whenever charging the Watch, overcharging will shorten the battery working life.
- Make sure that the Watch will be charged every month when not in use.

Battery

Your Max Pro has been optimized to deliver maximum battery life. Your X4 watch will give you a battery backup of 14-15 days under Typical Usage condition.

- Upto 10 Days Normal Usage**
Normal usage scenario : 10-11 days
Default dial, Manual heart rate, 4-5 app alerts, 75% brightness, Sleep monitoring enabled, Lift the wrist 100 times a day.
- Upto 6 Days Heavy Usage**
Heavy usage scenario : 5-6 days
Customized dial, Automatic heart rate on, 7-8 app alerts, 80%-90% brightness, Sleep monitoring enabled, Lift the wrist 100 times a day.
- Upto 15 Days Typical Run Time**
Default dial, Manual heart rate, 2-3 app alerts, 50%-60% brightness.
- 30 Days Standby Time**
Bluetooth off, using watch for normal functions.

* Standby time denotes a battery would perform in a single charge when it is not connected with a smart phone

1: Customizing Watch Faces

You can personalize your X4 watch with any of the pre loaded watch faces on the Coolwear/YFit App. You can also personalize the watch face with your own picture or photograph from your album. Go to Device in main Coolwear/YFit App choose watch faces Enter click **EDIT** on select picture / take picture from album & crop as desired and click the **✓** on top right screen. Once done press Ok on top right corner and APP will sync image as watch face.

2: Step

The watch will record the number of moving steps, distance and burned calories. Other fitness activity data will synchronize to the APP. It resets every day after 00:00, and all historical records are available in the APP.

3: Sleep

Your X4 will record the sleep time, the duration of deep and light sleep. You can view more data about sleep records through The APP. Default sleep statistics period: **8:00pm- 8:00am.**

4: Sport

Multi-Sport modes (Walk, Run, Cycling, Climb, Yoga, Basketball, Football, Badminton, Skip and Swim). Press the home button to pause/ stop the exercise mode. Exercise data will be synchronized to APP, you can view the detailed data records in the sports mode in the APP

- Watch doesn't have GPS, so when using GPS in sport mode, the APP will activate the mobile GPS to record the movement tracking.

5: Heart Rate

Enter the heart rate measuring interface & it will start in 2 seconds and take 15-30 seconds to complete. If you need heart rate measuring automatically, please set in APP. Steps to follow: [Device] → Open [Automatic heart rate detection]. You will have a more detailed view and analysis in the APP. [Note: Auto heart rate will decrease battery life]

6: Breath (Stress Buster)

Entering the breath training interface, you can choose the time and rhythm. For example, selecting the time of 1 minute and then the rhythm is slow. Click the breathing icon to start breathing training. Breathing training helps to reduce stress and improve well being.

7: Blood Oxygen

The principle of blood oxygen monitoring is to use the PPG measurement method to measure blood oxygen saturation through a light sensor. Put the smart watch on your wrist (do not tie too tightly) and start measuring, your result will be displayed in 20-25 sec. And all historical measuring result will be stored on the APP. Note: The results are for personal reference only and not for medical use.

8: Messages

Whenever there is a new message notification in the smart phone, the Watch will vibrate and synchronously show the message content. The Watch can save the latest 5 new messages and the latest new message will automatically overwrite the previously saved message, including SMS and other information.

9: News

You can activate app alerts from your favorite news app and get instant updates on your smart Watch.

10: Weather

You can view the weather today and for the next two days. You need to connect the Watch and APP to get weather information.

- The weather information displayed on the smartwatch is obtained from the mobile service provider. So if the service provider of the smartphone is different, the weather information displayed may be different.

11: Shutter

A: In the APP, go to [Device]—[Easy camera]
B: On the watch, from the main interface, swipe right then tap on "Shutter". Shake your smartwatch to take pictures from your mobile camera easily..

12: Music control

Play music in the smart phone and control it through your smart watch easily. Get the title of song, next & previous button, play / pause button & control music volume from your watch.

13: Find Phone & stop watch: Click to use it

Click this function to track the connected mobile device.

14: Setting

Tap on it to use: watch Face, QR code, Screen sleep, Brightness, Power off, Reset , Find phone, Stop watch

15: Sedentary Reminder

APP - [Device] - [Idle alert] Toggle to enable/disable the function. When there are no activities in 1 hour, or if less than a certain number of steps within a given period, the smartwatch will vibrate to remind you.

16: Call Reminder

APP - [Device] - [Call reminder]. Toggle to enable/disable the watch to remind you the incoming calls of your phone. Note: The watch cannot be used to answer calls or reply to messages. It can only display messages or reject the incoming call.

17: Alarm

The APP - [Device] - [Alarm]. Up to 5 alarms can be set. The alarm will only remind when the time set is more than 2 minutes later.

18: Wake Screen on Wrist Raising

Flipping your arm, the screen will automatically light up

19: Water Resistance

Your Watch has a level IP68 water resistance and supports cold water shower, swimming but not diving

20: ROHS

Your Max Pro X4 smartwatch is ROHS compliant. Maxima believes in doing its little bit for the planet and taking green initiatives to move towards a sustainable planet.

21: Firmware Upgrade

[Pairing App]—[Device]—[Firmware upgrade]—[upgrades]

2- Why can't the Watch receive the messages?

As the Android phone back platform will automatically clean up the less used software, it will cause the Watch to go offline and no longer push messages.

2.1: Ensure that the pairing APP is operating on the phone
2.2: Ensure that the applications that needed to be notified by the Watch must be logged in via smartphone in which your watch is connected. In case the notification is already read by other device (other smart phone & computer (Ipad)) in which the application is logged in then watch may not show the notification.
2.3: Ensure that the notification center of the smartphone software is open (if there is no message displayed in the notification bar of the phone, the message will not be displayed on the Watch);[Smart phone][Settings][App and notifications][Permissions][Coolwear/YFit App] Set all permissions to be ON.

Special Note : Above iOS 12 system version , [Settings] - [bluetooth] - [my devices] - [device name] - tap this [share system notifications] -open it

2.4: APP "permission settings":
First Step (Android Phone):
The APP - [Device] - [Background run permissions] - [Click]
Second Step (iOS & Android Phone):
The APP - [Device] - [App alerts] - [Message reminding] - [Coolwear/YFit] - [OFF] change to [ON]
Background run permission Please check the setting when the Bluetooth connection is abnormal, or the reminder is not received
