Unable to Switch on the Watch

Long press the push button for 3 seconds. If it still doesn't start, please charge the watch.

Automatic Shutdown

In case of low battery power, please charge the watch. If the problem persists, please contact our authorized dealer.

FAQs

Hardware related FAQs

Q: I am unable to switch on the smartwatch. What should I do?

Scenario 1 : Scenario 1: If the smartwatch is just out of the box, then you need to charge it until 100% charge is achieved.

Scenario 2 : If you have switched off the watch from the settings option then you need to connect it to the charger to switch on the watch.

Scenario 3 : The watch charging cable might have an issue because of which it's not charging the watch. Hence, you may need to change your charger.

After trying the above scenarios, if the issue still persists, please reach out to 18002660123 or send a mail to smartdesk@titan.co.in

Q: I have misplaced my charging cable. Where can I get that?

A: You need to visit the nearest service center and purchase it from there. This will be based on the availability of the charger/cable at that service center.

Q: Do I get an additional strap with the watch?

A: No, you don't get an additional strap with the watch.

Q: How long should I charge the watch to be 100%?

A: Watch gets fully charged in about 2 hours.

Q: What is the specification required for smartphones to connect with Reflex Play?

A: Android 8.0 + and IOS 12.1 +

Q: Are the charger and strap covered under warranty?

A: No, the charger and strap are not covered under warranty.

Application related FAQs

Q: Which application should I download to connect my watch to the smartphone?

A: The application that needs to be downloaded is “Fastrack Reflex World”. It is available both on Google Play Store & App Store.

Q: My smartwatch is not getting paired? How do I pair?

A: You can easily pair your Fastrack Reflex Play by following the below process - Download the Fastrack Reflex World App from Google Playstore/ Apple Appstore

Mobile Registration:

Enter your mobile number and select the checkbox to accept the terms and conditions. On the next screen, enter the OTP received to complete the registration.

Permissions & Access:

Provide necessary permissions to enable various features available on the Fastrack Reflex Play Smartwatch.

Pairing:

The next step is to pair the watch with the phone through the Fastrack Reflex World app.

To do this,

Tap on the “Scan” button on the app to open the camera.

Scan the QR code shown on the watch. In case you have paired the watch earlier and you are on the watch home screen, Navigate to the “About” screen by clicking on settings in the watch. Once you reach the “About” screen, you will find the QR code there.

Once the QR code is scanned, pairing would be successful.

The next step is to create a user profile in the application. Enter the details like Name, Gender, Birthday, Height, Weight, Sleep Duration Target, Multisport Target, and Steps Target.

The application will be ready for you to use and you will be able to experience the new journey in the Fastrack Reflex World.

Q: I am unable to receive the OTP for registering myself on the Fastrack Reflex World application. What can be done?

A: Please make sure that you have entered the correct and active mobile number for registration where you will receive the OTP via SMS.
If you still do not receive the OTP, please contact the toll-free number 18002660123 or can write to us at smartdesk@titan.co.in.

Q: I have purchased a new Fastrack Reflex Play and while I have completed my pairing with the application Fastrack Reflex World, it is asking for a Firmware Update. Is it mandatory to do so?

A: Yes, it's mandatory to update the firmware in order to experience the best version of the watch.

Q: My Fastrack Reflex World crashes every time I open the application. What needs to be done?

A: Kindly uninstall and reinstall the application. If the issue still persists, please contact the toll-free number 18002660123 or can write to us at smartdesk@titan.co.in.

Q: I am not located in India and my contact number comes with a different country code. How do I register myself in the application?

A: Even though you are not in India, the registration process for the application remains the same. Enter your mobile number and select the checkbox to accept the terms and conditions. On the next screen, enter the OTP to complete registration. The list of countries where you will receive the OTP is as follows:
Singapore, Australia, New Zealand, Fiji, Philippines, Nepal, Bhutan, Bangladesh, Qatar, Bahrain, UAE, Kuwait, Oman and Japan.

Q: What should be done to sync the smartwatch with the application?

A: On opening the application on your smartphone, the smartwatch data will be automatically synced. If you find that the watch is not synced or the data on the app is not changed you can swipe from top to bottom on the main page of the app and it will automatically sync with the watch.

Q: I am unable to adjust the brightness of my watch screen. Please help.

A: Go to settings of the watch and then tap on "Brightness" or you can also adjust the brightness by swiping down from the watch home screen. You can just tap on the "Brightness" icon to increase or decrease the brightness accordingly.

Q: What do I need to do to get the notifications on the smartwatch?

A: Notification access must be provided for the Fastrack Reflex World application from the phone settings.

On the app click on Settings > Turn On Notifications

You can select which app notification you would like to see on your watch.

Q: How do I change my Watchface?

A: There are two ways in which you will be able to change your watchface:

1. Long press on the watch home screen, swipe through the saved watchfaces and select your desired watchface.
2. Open the Fastrack Reflex World application and in the Settings menu, you will get watch faces. Select from a wide range of watch faces.

Q: Can I customize my own watch face?

A: Yes you will be able to customize your own watchface from the application under Settings > Watchfaces. You can choose any image from your gallery or click a picture from your phone camera and use the image as your watchface.

Q: Every time I do a multisport activity, after completion I see the watch saying "Workout was too short to be recorded". Why so?

A: A multisport activity should be done for more than 2 mins. for the watch to capture data. Each multisport activity has different threshold duration, after which only the activity is recorded.

Q: How to start a multisport activity?

A: To start a multisport activity, make sure your watch is well worn on your wrist, go to "Multisports" on your watch from the watch menu by swiping from bottom to top from your watch home screen. Select the multisport activity you are interested in and you are good to go.

Q: How to activate the women's health tracker?

A: The women's health tracker would be available only for female users. So make sure while onboarding in the Fastrack Reflex World app, you register as a female gender.

In the registration process, you will need to enter your details.

Q: Will I be able to check weather updates for other cities?

A: The Fastrack Reflex Play will be able to show the weather updates of your current city only. Your current city will get detected based on the phone's actual location. You can view 7 days of weather by scrolling in the "Weather" screen in the watch.

Q: Will I be able to receive calls through the Fastrack Reflex Play?

A: The Fastrack Reflex Play will provide you with incoming call alerts and will provide you with an option of rejecting the call or silent the call.

Q: How will I be able to change the screen timeout in Fastrack Reflex Play?

A: You can't change the screen timeout in Fastrack Reflex Play.

Q: I am unable to connect the watch straps to the watch head. Please help.

A: There is a quick-release pin that needs to be aligned in the hole provided on the watch head lug. You need to align the pin properly between the lug holes and connect the strap to the watch head.

Q: How can I check SpO2 in my watch?

A: You need to go to the watch menu options and tap on "SpO2". The watch automatically starts recording a value once you land on the SpO2 screen. Please ensure that your wrist is still while your SpO2 is measured by the watch. You can also view the average SpO2 and the last 7 recordings in the watch by scrolling down in the watch screen.

Q: How can I check the Heart Rate in my watch?

A: You need to go to the watch menu options and tap on "Heart Rate". The watch automatically starts recording a value once you land on the heart rate screen. Please ensure that your wrist is still while your heart rate is measured by the watch. You can also view your heart rate zone based on your heart rate and the average HRM and 24 x 7 heart rate readings.

Q: How can I check Blood Pressure in my watch?

A: You need to go to the Watch Menu options and tap on "Blood Pressure". The watch automatically starts recording a value once you land on the Blood Pressure screen. Please ensure that your wrist is still while your BP is measured by the watch. You can also view the average BP and the last 7 recordings in the watch by scrolling down in the watch screen.

Q: How can I change the units of measurement in my watch?

A: You can change the units of measurement in your watch by going to App > Settings > My Watch and toggling between Imperial/ Metric format for temperature formats and other data displays.

Q: How do I use camera control and where is the image saved in the phone?

A: Open the “Camera” from the watch menu. This will open a camera icon on your watch. Tap the icon to open the In-App Camera on your phone. Tap again to click a photo which will be saved in your phone’s gallery.

Note: The app needs to be opened first, then only the In-App Camera would open when you click on camera from the watch.

Q: My phone is continuously ringing even after I have gone back to some other screen in the watch or pressed the power button in my phone. How do I stop the ringing after I have found my phone?

A: Tapping on “Find Phone” from the Fastrack Reflex Play raises a notification on the phone apart from the ringing in the phone. Just tap on the notification from the Fastrack Reflex World app and the phone would stop ringing.

In case there are major issues being faced that are not being resolved by any of the above answers mentioned, especially with respect to the hardware of the watch, like the screen blanking out or the watch not charging, request you to please issue a replacement to the customer.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Disclaimer

Note on the accuracy of Fitness

Fitness Watches like the Fastrack Reflex Play are intended to be tools to provide you with information on your lifestyle and training performance and to encourage an active and healthy lifestyle. The watch relies on sensors that track your movement, sleep, and other metrics.

The data and information provided by these devices are intended to be a close estimation of your activity and metrics tracked, but may not be completely accurate, including the steps, distance, calories, etc.

P.S - Accurate user data (height, weight, gender, and age) information improves the accuracy of the algorithms that process the activity data. The Fastrack Reflex Play watch is not a medical device and the data should not be used for medical purposes like diagnosis, treatment, cure, or prevention of any physiological conditions.

We recommend you consult your doctor before engaging in any exercise routine.
