Bluetooth Keyboard Connection

Windows, Android, and iOS three in one system

1. Unlock the tablet, enter into "Start" interface
2. Click "Setting" and then choose "Change the setting"
3. Click "Wireless", turn on the Bluetooth
4. Click "Device", choose to add the devices
5. Turn on the Bluetooth keyboard, the blue light will twinkle quickly. Press Fn + C for 2 to 3 seconds, so the keyboard will search the device
6. The tablet will show BT 3.0 Keyboard, click it to pair
7. The blue light will turn off, if paired successfully. Password is not needed while pairing.

Turn on the device → Changing computer settings → Click on wireless → Select equipment → Add equipment

Connection successful ← Enter the prompt for password ← Search equipment ← Power On the keyboard
1. If you want the Bluetooth keyboard to connect with a Smartphone, laptop or desk computer, they should have an inbuilt Bluetooth.
2. When you turn on the Bluetooth keyboard for the second time, it connects automatically.
3. The letter '?' should be the same color as Fn, when you want to get Fn + ? function.

Channel switch function

The Bluetooth keyboard has two channels, it works on two devices at the same time, just by switching the channel.

CH1⇌CH2   ON/OFF
1. During first connection, the button should be at CH1 position, connect with your first device, then slide the button at the CH2 position, connect with your second device.
2. If you just need use your first device, keep the button at the position of CH1; if you need to use your second device, just switch the button to CH2 position.

Tips

1. When the keyboard restarts, no need to press any keys on Android or Windows devices. Just wait for 3 to 5 seconds, it will automatically get connected. iOS devices may take little longer to connect.
2. The keyboard is a three-in-one system with two channels. The connection time is different according to the brand of tablet, smartphone, computers and their bluetooth version.

Compatibility

1. Android 3.0 or above
2. iOS 4.0 or above
3. windows XP, Window 7 or above

Sleep mode

The device will enter sleeping mode if not used for 10 minutes. When in sleep mode, press any key and wait for 3 seconds to wake up the screen.

Charging

**When the indicator light changes to red & starts flashes,
it needs charging.**

1. Plug in the keyboard to the charging port
2. Plug USB into the adapter or the USB port of a computer
3. The red light will indicate product charging. The light will turn
   off when the product will be fully charged.
