- In case of an overload, the blade of the jar stops rotating and the motor gets jammed or starts heating up.
- If such a situation occurs the mixer grinder will automatically trip off and hence protect the motor.
- Let the motor cool down for a couple of minute. The red button of the overload protector switch located at the bottom of the mixer grinder has to be pressed for re-operation.
- If you have to reset the OLP again and again, try reducing the quantity of ingredients in the Jar.
