What is a Mouse Bungee used for?

The Razer Mouse Bungee V3 Chroma manages your mouse cable by keeping it attached to an elevated spring arm, ensuring minimal cable drag and a near-wireless feel using use. It can fit mouse cables from all major mouse brands.

Is the Mouse Bungee only available with Razer Chroma?

The Razer Mouse Bungee V3 is also available. This product is a variant without Razer Chroma™ RGB.

What kind of cable catch is used in the Razer Mouse Bungee V3 Chroma?

The Razer Mouse Bungee V3 Chroma uses a spring arm with clip-on cable catch for drag-free cable control. The cable catch can fit most types of mouse cables and is rubber coated to prevent your cable from damaging during use, while the spring arm keeps it elevated so it remains free from any obstruction.

What is the base of the Razer Mouse Bungee V3 Chroma?

The Mouse Bungee V3 Chroma is designed with a Weighted, anti-slip base for added stability. It's weighted base and grippy rubber feet keep it from moving about or toppling over, no matter how hectic your gaming gets.

What mouse cables can the Mouse Bungee fit?

It can fit different types of mouse cables (rubber, braided, paracord) from major brands.

Can the Mouse Bungee light up without Synapse?

Yes, it will still light up with Spectrum Cycling effect by default when you connect it via USB, but you will not be able to change the colors, brightness, or effects without Synapse 3.
