100% COPPER BLDC MOTOR**

ENERGY-EFFICIENT, HIGH TORQUE AND  
LOW TEMPERATURE RISE FOR LONGER MOTOR LIFE

The powerful permanent magnets combined with UNIFORM electromagnetic field in its BLDC motor consumes 50% less power thus offering annual savings than an AC motor fan. While the High Torque produced by BLDC Motor enables High air delivery, this motor keeps the circuits cool by ensuring minimal heat generation. BLDC Motor ensures Consistent performance of fan even at low voltage up to 150 volts. With longer running time on Power Back-up & Inverter, this microchip enabled motor allows the fan to rotate in both clockwise and anti-clockwise direction.
