MICROCHIP CONTROLLED 100% COPPER BLDC MOTOR

ENERGY-EFFICIENT, HIGH TORQUE AND
LOW TEMPERATURE RISE FOR LONGER MOTOR LIFE

The powerful permanent magnets combined with uniform electromagnetic field in its BLDC motor consumes 50% less power thus offering more annual savings than an AC motor fan. While the high torque produced by BLDC motor enables high air delivery, this motor keeps the circuits cool by ensuring minimal heat generation. BLDC motor ensures consistent performance of fan even at low voltage, up to 150 volts. With longer running time on power back-up & inverter, this microchip enabled motor allows the fan to rotate in both clockwise and anti-clockwise direction.

A range of fans that keeps dust at bay.

GOODBYE DUST At Usha, we have always been inspired by nature. Our new range of ceiling fans is inspired by the Lotus, known for its dirt and water repelling qualities. The Lotus stays pristinely clean at all times. Coated with superior polyurethane lacquer, our fans resist accumulation of dirt. They are also hydrophobic (water resistant), oleophobic (oil resistant) and extremely easy to clean.
