

U S H A®

USHA WATER HEATERS

THE LUXURY OF CHOICE
A SPLASH OF WARMTH

CHOOSE YOUR WARMTH

A water heater must be perfect for your home requirements and look equally stunning at the same time. Usha Water heaters come in different containment limits, the most trendsetting shapes and optimal heating capacities to suit you or your family's daily needs.

STORAGE WATER HEATERS

These are ideal for larger bathrooms and come in different storage capacities to suit your individual requirements. Super convenient to use, these heaters start reheating the water as soon as it runs cold when switched on. The large range of attractive shapes and forms such as cube, cylinder, rectangle and oval, fit into your space, enhancing it with their attractive charm.

U S H A
LIVING
INNOVATIONS

TECHNOLOGY
OF HEATING SOLUTIONS
THAT CHANGE LIVES

At Usha we believe that comfort can always be upgraded, safety can always be enhanced and heating solutions can be made more intuitive. Our teams of Innovation Engineers are constantly at work to make our range of water heaters more efficient, safer and smarter, so your life can be made more convenient.

We call this 'Living Innovations'.

TECHNOLOGY THAT CARES

ANTI-BACTERIAL STERILIZATION

Water heating system that simultaneously prevents bacterial build up and gives you pristine hot water.

WHIRL FLOW TECHNOLOGY

Get quick and energy efficient water heating with innovative inlet pipe facilitating circulation.

Efficient Elements

SS316L and Copper ensure efficient heating and reduce the humming noise.

Glass Line Enamel Coating

Get hot water year after year with cutting edge glass line enamel coating that prevents corrosion and increases life span.

Weather Proof Performance

IPX4 weather proof coating ensures protection against weather and splashes.

TECHNOLOGY THAT IS SMART

SELF-LEARNING INTELLIGENCE

The Aqua Tide observes usage and automatically sets temperature and water heat capacity based on regular study.

PERFORMANCE BASED HEATTECH

This smart water heater enables 20% more hot water utilization and energy efficiency.

Preset Timer Mode

Remotely configure this preset timer and enjoy hot water at your leisure.

Digital Temperature Setting

Know the water temperature at a glance with this sleek digital display and control the heating.

TECHNOLOGY THAT IS **SAFE**

ELCB FOR ELECTRICAL SAFETY

Stay protected from electric shocks
and earthing leakages.

TEMPERATURE SENSOR AND THERMAL CUT OFF

Forget overheating, with automatic
cut off the range never exceeds the
set temperature.

DRY HEATING PROTECTION

The device doesn't heat up in
absence of water and keeps the
elements protected.

USHA WATER HEATER SMART SELECTION **GUIDE**

TIPS TO HELP YOU ON SELECTING THE RIGHT WATER HEATER CAPACITY.

Different bathing styles require different water usage: A bathtub, showers and the commonly used bucket, all consume different volume of heated water. Average warm water consumption in various usage options are as below.

COMFORTABLE WARM WATER TEMPERATURE

In Usha water heaters temperature can be set from 35° to 75°C. The comfortable range of warm water for the human body is in the range of 40° to 45°C.

The lower the ambient temperature, the cooler the water in the tap and hence a need for higher volume of hot water for mixing to get the desired warm water temperature. In case of cold weather conditions it is advisable to have a higher capacity of water heater looking into the consumption.

WATER FLOW RATE

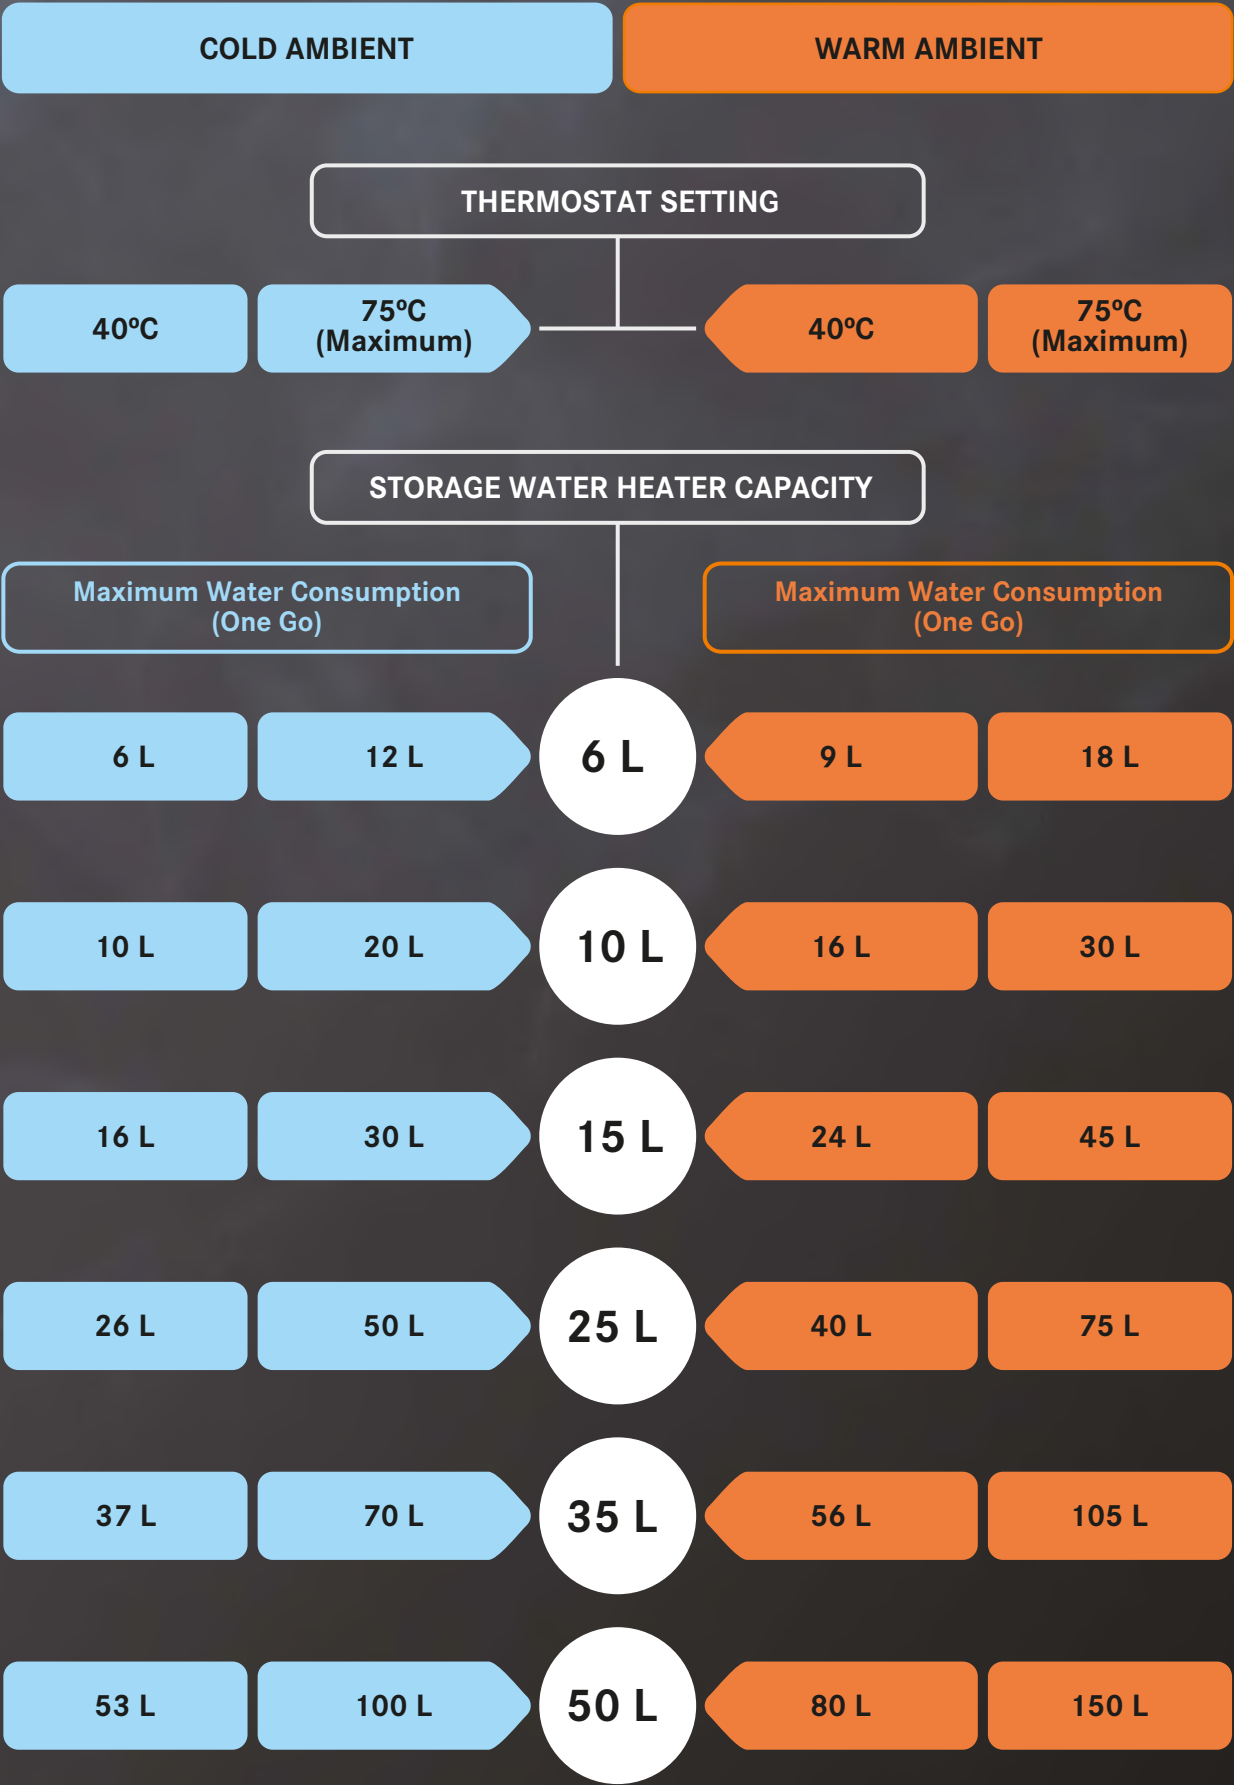

Water flow rate refers to the rate at which water flows into the water heater. The faster the speed of inlet water, the slower the water is heated to set temperature. In this scenario, it is desirable to go for a higher capacity Water Heater, as the pre-heated water in the tank will help modulate the drop in temperature due to the fast flowing inlet water and speedily provide water at the desired temperature.

SAVE ENERGY

Made to provide best in class performance and energy efficiency, USHA range of water heaters come with BEE 5 star rating, helping you save on your electricity bills. Choosing the optimum capacity of water heater further helps in reducing operating costs.

THE SMART SELECTION GUIDE AT A GLANCE

- The inlet water temperature considered for Cold ambient is at 10°C and for Warm ambient is at 20°C.
- In case of more than one user the water heater generally takes 15 to 25 minutes to reheat to desired temperature.
- All values mentioned above are as per average user consumption and are approximate.

WARMTH SQUARED

THE CUBIC
DESIGN
PHILOSOPHY.
NOW IN
YOUR HOME.

From Cubic architecture, to cubic gadgets and devices, modernism and minimalism has been defined by compact geometric structure and forms. Find that sleek, unobtrusive use of space mesmerizingly captured in Usha's innovative square water heaters. Equipped to fit unobtrusively into any space, these water heaters are perfect for modern apartment living and an asset to the beauty of its interiors. Choose from our extensive Cubic Range of Bathroom Water Heaters and find the one that's apt for you.

WARRANTY

8 YEARS ON TANK

3 YEARS ON ELEMENT

2 YEARS ON PRODUCT

Technical specifications are subject to change without prior notice. Product image is indicative, actual product may differ. Product can withstand pressure upto 8 bar(0.8Mpa)

Smart Features

Intelligent Features through App

Monitoring of Power Consumption, easy schedule of operations and other innovative features at the tip of your fingertips with the Usha app

Anti-Bacterial Sterilization

The Aquerra Smart comes with an anti-bacterial function set at 80° to ensure a safe and enjoyable experience.

Performance Based HeatTech

This smart water heater enables 20% more hot water utilization and energy efficiency.

Safety Features

ELCB for Electrical Safety

Protects against electric shocks and earth leakages.

Temperature Sensor

The Aquerra Smart senses heat patterns and initiates electricity cut off when temperature exceeds the set limit.

Dry Heating Protection

It stops heating when water supply is cut off, thus protecting elements from burning out.

IntelliValve

Protects water heater from internal overpressure. Moreover, it limits the backflow of hot water into supply pipe.

Salient Features

Glass Line Coating

Protects tank for longer life.

Whirl Flow Technology

For faster heating and maximum energy saving.

ECO Function

Saves electricity and utilizes it efficiently.

Error Code Display

Alerts in time for easy troubleshooting.

Aquerra DG

Warm water is not just a modern luxury but an essential need in our day to day life. From killing germs, offering the convenience of remote operation and rejuvenation of the body with its constant therapeutic flow, the Aquerra's Storage Water Heater is not just smart but stylish too. Designed in a modern cubic form and available in a wide range of attractive colours, the Usha Aquerra Series is the epitome of stylish warmth.
