### CHARGING

- Connect one end of the provided cable to the USB Type C port on the headset and the other end to a wall adapter or laptop
- While charging the indicator LED turns into steady red
- When the headphone is fully charged, the indicator switches off
- Use only authorized/company chargers for the headset, as unauthorized ones may damage the same and invalidate the warranty on the headset as well
- The headphones should not be utilized for listening purposes while it is in charging mode

*Note: When the headphones are in low power state, then that gets indicated by flashing red LED.*

### ENx™ TECH

Our ENx™ tech algorithm cancels out the background noise so that you can be heard crystal clear via voice calls. One need not activate ENx™ as the mic is equipped with the same and activated by default.

*Deliver your voice without interruptions anywhere – traffic, railway stations, airports, work space; literally anywhere!*

### RESET

When the headphone is in the 'ON' state, press and hold the MFB and Vol - buttons simultaneously for 4 seconds.

*Note: Vol- button should be pressed slightly earlier.*

### OTHER FUNCTIONS

- If there's no connection established when the Bluetooth is switched on then the device powers off automatically after a while
- If you receive an incoming call during playing music, the music automatically disconnects. When the call is done and disconnected, the music starts to play automatically from where it left

### ANOMALIES & SOLUTIONS

#### A : Mobile can't search the headset

- Check if the Bluetooth headset is powered on or off (When powered on, the LEDs blink with red and blue colours alternatively)
- If it is powered on and the device still can't connect, then please reboot the Bluetooth device and the phone

#### B. After connecting the headset with the phone, disconnection or noise occurs

- This may be due to the low power of the headset. Please charge the Bluetooth headset
- There might be obstruction between the headset and the phone or the distance between them exceeds the maximum range for signal reception

#### C. If the Voice Assistant support doesn't respond

- If the voice assistant doesn't get triggered, then the functionality has to be first enabled via your media device's settings.
