Yale

Our Story

At Yale, we have a 180 year history of trusted innovation.

Everything we are today, we owe to the inspirational ingenuity of Linus Yale Senior and Linus Yale Junior. The Yale lock tradition started around 1840 when Linus Yale Senior opened up a lock shop specializing in expensive handmade bank locks. Inspired by a 4,000 year old Egyptian wooden lock, he built the first models of the pin-tumbler lock he had developed.

To manufacture them, he built a small lock factory in Newport, USA in 1847. His son, Linus Yale Junior, took up his father's trade. Technically very talented and with a number of ground-breaking inventions, he made his father's pin-tumbler lock design suitable for mass production in the early 1860s and changed the industry forever.

Linus Yale Junior and his colleague, Henry Towne, established the Yale & Towne Company in Stamford, Connecticut in 1868. By the early 20th Century, they employed more than 12,000 people and had expanded globally. Even today, the pin-tumbler lock by Linus Yale Junior is the most widely used type of door lock in the world.

Part of ASSA ABLOY Group since 2000, Yale is the leading residential brand of the Group.

Beside the world's most widely used type of door lock, Yale has produced numerous other innovative products such as digital door and cabinet locks, alarms, safes, doors, windows, access systems and hardware for doors and windows.

Yale is the brand behind locks of every design and function in over 125 countries.

All over the world, we're trusted to make homes secure and people feel secure, too.

Trusted every day since 1840

Yale is trusted by millions of people every day to keep what's important to them safe.

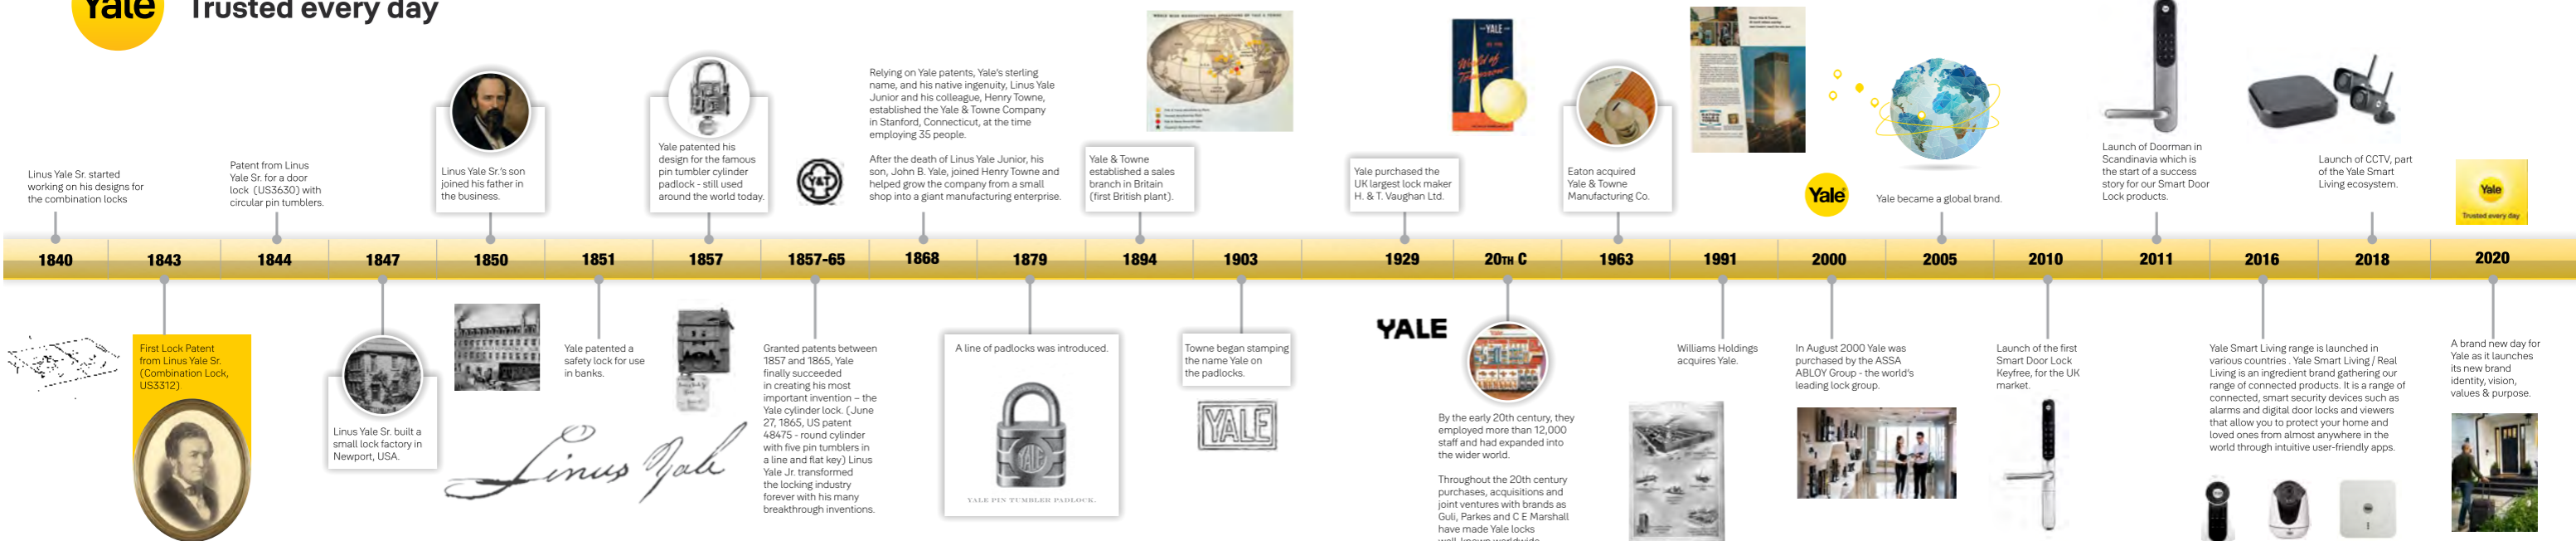

Our innovations have protected their homes, families and belongings for over 180 years. We have expanded from being a leader in mechanical lock engineering to innovating connected smart locks and homes.

Because we always make every effort to push the boundaries in a changing world.

We were there for your grandparents (and probably theirs) and we'll be there for your children.

Today, and every day to come.

Yale Trusted every day

You Value it, We protect it.

At Yale we've been looking after people's homes and their favourite things for over two hundred years. We understand that the truest form of security is the freedom to enjoy living life to the full, without worry. The Yale Safe Collection has been designed to provide just that. As one of the world's best known, and preferred, leading lock brands we follow our mission to help consumers live more carefree lives. So we have combined the latest technologies and materials with centuries of experience to create safes that meet the most demanding requirements.

Today Yale is the brand behind locks of every design and function in over 125 countries. All over the world, people are actively securing their home or their business with the name they trust the most, Yale. That's why we proudly call Yale "the world's favourite lock".

Fire Safes

The Yale Fire Safes have been designed with your peace of mind in focus. The entire range has been built and tested to withstand intense heat of 927 degree Celsius, humidity and resist attack, leaving you the knowledge that your most important documents are in good hands.

The Yale Fire Safes are built with the latest technology in fire insulation, which provides a high security rating and allows more room for your valuables inside your safe due to the thinner wall thickness.

Key features

- Tested to withstand minimum 1 hour of intense heat at 972 degrees
- Emergency battery opening and low battery alarm signal (9v battery not supplied)
- Touch screen keypad wakes with over 1 billion possible codes

Additional features

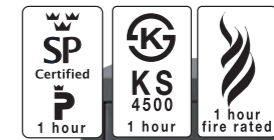

- You can choose between 1 - 48 hours lock down mode for added security whilst away from home
- The option to switch the sound off when entering the code or when the safe is opening
- Hinge protected for extra security - Locking points on both sides of the safes, 16mm locking bolts in the frame and 18mm fixed bolts on the hinge side

FIRE FINGERPRINT SAFES

Fire Fingerprint Safes

The new range of Yale Fire Safes has been designed with your peace of mind in focus. The entire range has been built and thoroughly tested to withstand intense heat and humidity, resist attack, leaving you the knowledge that your most precious documents are in good hands.

Two types of highly resistant safe-boxes guarantee a high level of protection and fire resistance. All Yale Fire Safes are thoroughly tested, both in our internal labs and with independent external testing institutes to withstand extreme temperatures and humidity.

A fire test is performed in a furnace where the safe is brought up to a temperature of 927 degrees celsius – simulating the extreme temperatures that occur under a house fire. The Yale Fire Safes are built with the latest technology in fire insulation which gives excellent protection and allows more room for your valuables inside your safe due to the thinner wall thickness.

Yale YFF- fire safe provides Biometric access provides 60 minute fire resistance

Advanced Bio-metric swipe type finger print reader with 128 finger prints registration.

Added Security: The two 18 mm solid steel locking bolts and hardened hinges secure against attack

Emergency access: In case of lockout, a master reset code is provided and the external 9 V battery contacts provide a way to power the safe if the batteries run out

Time lock (if wrong code entered); can be set from 3 to 9 minutes (factory set 3 minutes) Privacy number input; real code followed or preceded by random numbers opens the lock

The safe has a sealed shell of galvanized steel which gives double rust protection Certificates

Tested to withstand up to one hour intense fire
Internal temperature will not exceed 150 Degree Celsius in 927 Degree Celsius furnace Certified by SP (Swedish National Testing & Research Institute) and KS (Korea Standard)

Cosmos Safes

At Yale, we pride ourselves in protecting the things that matter the most to you. Yale Cosmos Series Safes will keep your most important belongings secure against attacks with strong steel body & secure bolts. With a pin code, you are able to gain quick access to your safe.

It nicely accommodates a wide range of items, including legal documents, passports, jewelry, cash, and more. Whether that is your camera to capture those special moments or a sentimental belonging, we have the right safe to suit you.

You Value it, We Protect it!

Total Peace of Mind

Cosmos Electronic safe comes with two locking bolts and with steel body for protection against all attacks. Ideal for storing important documents, jewelry, and other valuables.

Convenience

Equipped with an electronic lock and Digital pin access, Yale safe offers quick set-up and easy operation. One-key locking: Simply press, "Enter" to lock the safe without changing the pass code. It also avoids in-convenience of auto reset and password deletion in case of battery change as safe memory keeps your code and details alive unless you change it.

Digital Solution

With 4-6 digit password combination, it provides one million possible combinations; your pass code will be a lot tougher to crack. On top of this, it is automatically locks down for 5 minutes on three consecutive incorrect pass code entries.

Status Information

Safe guides on the operation status notification with its smart display and information of critical details like low battery notifications.

Motorized Bolts

With motorized bolts, Yale cosmos safe not only provide enhanced security when compared to traditional solenoid safes but it also assist in ease of operation and usage as well.

Emergency access

In case of lockout, a master reset code can be used while mechanical key provides a way to open the safe if the batteries run out
