

USHA[®]

COOL, FRESH & HEALTHY AIR.

Air Coolers Collection-2024

WHY USHA AIR COOLERS?

USHA's range of powerful air coolers make them a must-have for the hottest days of the summer. They promise to bring you great respite even on peak days of dry heat-whether you are indoors or outdoors.

Air Performance:

USHA Air Coolers come equipped with the latest in fan and blower technology to meet your heavy summer cooling needs.

- *The fans and blowers are made of anti-corrosion ABS plastic/aluminum material for longer life and durability.*
- *Aerodynamically designed with a large sweep of upto 45 cm , the fans in USHA Coolers provide you with powerful air throw up to 12 m.*
- *The 5 leaf fan effectively spreads the air throughout the room along with delivering high volume of air.*
- *The USHA TPW cooler series comes with blowers of height upto 20.5 cm , which provide you powerful air throw.*

ECCOOL Honeycomb:

USHA Air Coolers come with the best in class EcoCool pads that are a revolution in Honeycomb design.

- *These EcoCool evaporative cooling pads, made of cellulose paper, are engineered from cross-sectional, specially treated fluted media and are capable of absorbing and retaining water for a longer period to provide the maximum cooling efficiency. The cellulose media is treated with stiffening and rot-resisting agents as well as specialised odourless adhesives to increase its useful life and durability.*

Benefits:

- **Effective Cooling:** *Lowers temperature at minimal energy cost.*
- **Energy Efficient:** *Allows higher cooling with lower air volume; pads have saturation effectiveness with over 80% cooling efficiency.*
- **Higher Operational Consistency:** *The specially engineered fluted structure of EcoCool prevents sagging and clogging thus delivering cool air for longer period of time.*
- **Maintenance Free:** *EcoCool has a unique structure which does not allow dust and other dirt to settle on it.*
- **More Effective:** *EcoCool can treble the air velocity over the same area, compared to any other type of Honeycomb pads.*

Highly Durable Submersible Pump:

Unlike other air coolers, USHA Air Coolers are powered by a state-of-the-art submersible pump.

- *The pump is concealed (from water)– referring to the magnetic roller assembly which is the heart of the pump that is responsible for water suction.*
- *Being concealed, the pump supports uninterrupted performance, even when running on dirty or hard water.*
- *The superior durability of this pump ensures efficient cooling season after season.*

Doorstep Service:

USHA's promise of excellent doorstep service:

- *725+ service partners present in 437 cities across India.*
- *Dedicated 2000+ trained service technicians to cater to all your service needs.*
- *In-house customer care team with 100+ operators assisting customers 24X7 at **USHAcare**[®] Toll Free No. 1800 1033 111 in 9 languages. Complaint registration facility available through a web portal at care.usha.com.*

Auto Tank Fill with Float Valve Technology

Auto Tank Fill enables automatic filling and refilling for non-stop performance.

Auto Drain

Auto Drain function for motorised water drainage eliminates the chances of stagnant water collection.

Dust Filter

Filters out any dust entering the EcoCool pads for clean and dust-free air.

Ice Chamber

Ice chamber for cooling water which speeds up and increases cooling efficiency.

Shower Distribution Channel

Shower Distribution Channel for effective and even spread of water over the EcoCool pads.

Remote Control

Convenient air cooler control from a distance.

Low Water Alarm

Automated reminders to refill water.

Humidity Control

Adjust the water usage in your air cooler to control humidity.

Anti-Bacterial Tank

Specialised plastic coating for prevention of bacterial and fungal growth.

Thermal Overload Protection (TOP)

Thermal safety protection for motor and pump with inbuilt auto resettable thermal cutout.

DESERT AIR COOLERS

Ideal for mid to large sized living areas and semi-outdoor spaces, USHA Desert Air Coolers are a must have for the hottest days of summer. Their large tank capacity and powerful airflow not only promise respite from the heat for longer hours but also give one of the most comfortable cooling experiences.

USHA[®]

AEROSTYLE ELECTRONIC

The new Aerostyle Electronic range of air coolers from USHA are the perfect blend of style and performance.

This family of air coolers catering to different cooling and convenience needs of house/ office, ensures a powerful cooling experience with their intelligent features of low water alarm, off-timer, electronic control panel with remote control, superior honeycomb, ice chamber and humidity control feature. Moreover, their fully closeable front louvers prevent dust and mosquitoes from entering the air cooler, thus making their maintenance extremely easy.

DESERT AIR COOLERS

100 L / 70 L

Electronic panel with remote control: Easy operation from any where in the room.

Off timer: Air cooler unit will turn to standby mode after the set off timer from 1 hour to 8 hour.

Empty tank alarm: The air cooler is equipped with an empty tank alarm system, when ever water level in the tank goes below low level, beep sound alarm will be activated.

Large 45.5 cm fan blade: For powerful air throw upto 12m and fast cooling.

Cooling Area: up to 48m²

OTHER FEATURES

Fan Motor With Ball Bearing | Premium Aesthetic Design | Humidity Control With Auto Drain | Shower Distribution Channel | Auto Swing Through Motorised Vertical Louvers | Fully Closeable Front Louvers | 3 Speed Level: High / medium / low | Ice Chamber | 55mm Thick Eco Cool 3 Side Honeycomb Media | Water Level Indicator | Dust Filter | Power Consumption 200W | Works On Inverter | Castor Wheels: Easy Mobility; Wheel Locking

Model	Capacity	Length (L)	Width (W)	Height (H)
100ASD1E	100 L	70.5 cm	49.0 cm	1.26 m
70ASD1E	70 L	70.5 cm	49.0 cm	1.19 m

*Specifications are subject to change without prior notice.

WINDOW AIR COOLERS

Window air coolers, as their name suggests, are air coolers which are best suited to be installed on the window frame. These air coolers, inspired from the conventional air coolers, are powerful, have a large tank capacity and take up no virtually no floor space inside the house. In addition to all this, they come with honeycomb pads and superior grade plastic bodies, making them more durable and longer lasting than conventional air coolers.

USHA[®]

AZZURO DLX 50

USHA Azzuro Dlx Window Air Cooler is designed keeping convenience in mind. It comes with a front water inlet and an auto tank fill feature to make water filling as easy as possible. Moreover with its powerful airflow Azzuro Dlx becomes one of the best choices to beat the heat this summer.

WINDOW AIR COOLERS

50 L

Powerful airthrow of upto 6m:
Gives a super-fast cooling experience.

Thermal Overload Protection technology: Motor is fitted with Self resettable TOP (Thermal Overload Protection) device to keep the motor safe from burning due to high temperature.

Compact design: Installed like a window AC, this air cooler occupies the least space while providing one of the best cooling experiences for a room.

Cooling Area: up to 35 m²

*Trolley is optional as an accessory.
